FIVE FUN WAYS TO PARTICIPATE

Everyday Safer is a free WA Government education program delivered by the Road Safety Commission that inspires positive road use behaviour through immersive and engaging road safety learning in WA schools. The Road Smart Grants enable learnings from the education program to be transferred into practical, student-led projects in your school and local community. The grants consist of three funding streams. This resource focuses on the Power Up Grants (valued up to $500).

PACKAGE 1

STUDENT ASSEMBLY SHOWCASE

Students identify a local road safety issue and create an assembly presentation or performance that delivers clear, practical behaviour-change messages to their peers.

A whole-school reach, which can be amplified with merchandise or takeaway materials to reinforce the key messages beyond the assembly.

PACKAGE 2

STUDENT-LED ROAD SAFETY ADVOCACY

Empower students to become road safe advocates in their community. Through a facilitated workshop or forums, students connect with local stakeholders (council, police, transport agencies) to share their insights and help advocate for safer roads.

This package supports authentic student voices while building real-world engagement and leadership skills. Catering and takeaway resources can help make the session more welcoming and memorable.

PACKAGE 3

ROAD SAFETY LEARNING EXPERIENCES

Extend student learning through targeted, hands-on experiences that build knowledge, skills and confidence in making safe road choices.

Students (with support from a teacher) can organise experiences that best suit their context, including incursions or excursions such as guest speakers, bike skills sessions or a cycle accreditation. These opportunities deepen understanding while supporting curriculum outcomes.

PACKAGE 4

STUDENT-LED COMMUNITY SHOWCASE

Students design and deliver an interactive showcase at a community event for example, an open night or local gathering - sharing road safety messages with families and residents.

Takeaway resources such as pledge cards, stickers or merchandise can further extend impact. This option can grow into an ongoing annual road safety event.

PACKAGE 5

ROAD SAFETY CAMPAIGN

Harness student creativity to promote safer behaviours among current and future road users.

Students create and share campaign materials such as posters, videos or digital content that focus on practical actions to improve road safety across the school and local community.

READY TO POWER UP YOUR STUDENTS?

1. Talk to your students.
2. Discuss the packages with your students and choose the best fit.
3. Plan your project.
4. Apply (Contact the Road Safety Commission's Community Education and Engagement team at grants@rsc.wa.gov.au for application link)
